Overlook Drive Path – Great Falls

TA 5299(124)
UPN 8694000

Project scope: 0.25 miles of new multi-use path along Overlook Drive in Great Falls. The new multi-use path was constructed along a narrow corridor which was difficult for non-motorized users to use. The new section of path connects to an existing path along Overlook Drive and trails in Warden Park. In addition, it allows for a full off-street connection from The River's Edge Trail to 10th Avenue South and the separated path across the Missouri River bridge. The project included a new 8-foot wide concrete multi-use path, curb & gutter, ADA ramps, retaining walls, drainage improvements, signing, striping, and revegetation.

Consulting Engineer: TD&H Engineering
Contractor: United Materials of Great Falls
Completed in 2018

Project costs:
Preliminary Engineering: \$155,309
Construction and Construction Engineering: \$602,291
