INTRODUCTION

This report is an annual summary of traffic patterns at each of the Montana Department of Transportation's Continuous Traffic Count Stations. The map on the following page displays the locations of each station. The Continuous Count Stations (CCS) are distributed by Functional Classification as follows:

Functional Classification	Urban	Rural
Principal Arterial (Interstate)	5	18
Principal Arterial (other)	8	41
Minor Arterial	5	17
Major Collector	3	9
Minor Collector	0	0
Local	0	1
Total	21	86

Each report header list the CCS Location ID, County, Street/Highway description, functional classification, and Traffic Factor Group.

The **Traffic Factor Group** generally aligns with the roadway's functional classification apart from rural/urban designation and an added designation for recreational routes. Urban and Rural Traffic Factor Group designations consider hourly, day of week, and seasonal traffic patterns, therefore the CCS' assigned Traffic Factor Group does not always align with it's functional classification. Continuous Count Stations located just outside of urban areas are functionally classified as rural but are commonly assigned an urban Traffic Factor Group designation due to the commuter travel patterns. Sites with high summer volumes and/or high weekend volumes are grouped together in the Recreational Factor Group.

The following reports are provided for each CCS:

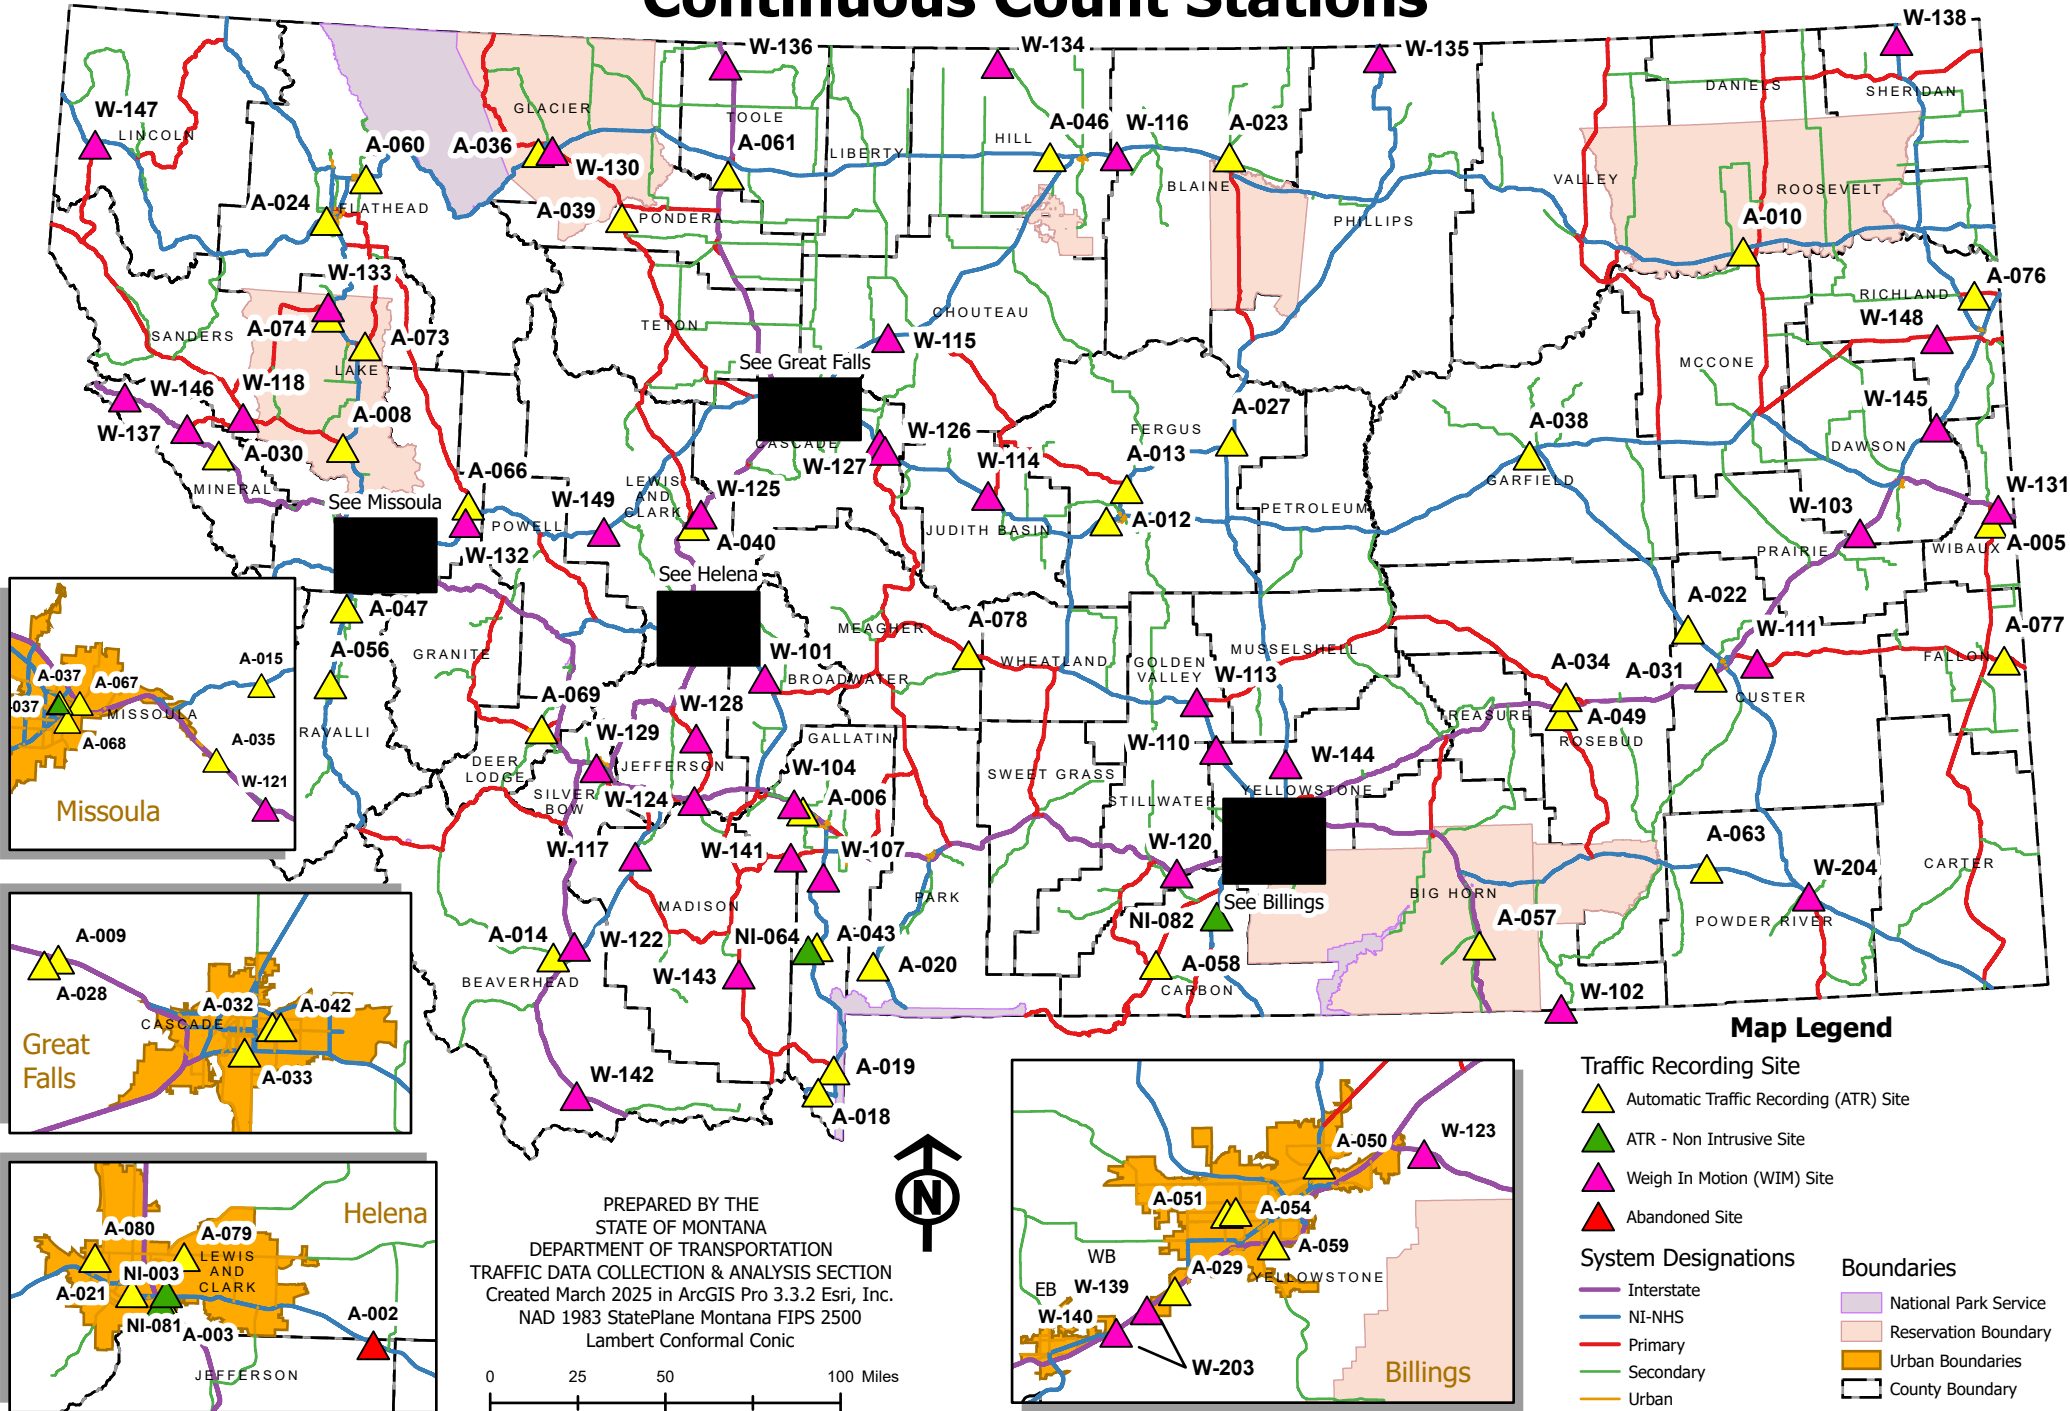

The **Yearly CCS Profile** report summarizes the daily, weekly, monthly, and annual traffic volume statistics for each location. Directional Splits (the percentage of vehicles in each direction) are reported. When sites are configured to collect specific vehicle type information, the traffic mix is included. The Traffic Mix is reported as the percentage of Passenger Vehicles (Pass), Single Unit Commercial Vehicles (SU), and Combination Unit Commercial Vehicles (CU).

The **Yearly Peak Hourly Volumes** report displays current and historic Annual Average Daily Traffic (AADT) volumes, high hour volumes, and the Design Hour Volume (DHV).
