## SLC Center Frequencies LOW ALTITUDE

January 1, 2025

The Montana Department of Transportation (MDT) Aeronautics Division is proud to present you with the 64<sup>th</sup> Annual Montana Airport Directory.

This year's cover photo, selected by the staff at the Aeronautics Division, was photographed by Casey Heupel while piloting his balloon from Glacier Park International Airport. Casey captured his friend Kevin Flanagan lifting off in another balloon while a scheduled airliner prepared to depart from Runway 02.

Casey grew up in North Dakota and had his first balloon ride in 1988. After relocating to Whitefish, Montana, he met others involved with ballooning and became a balloon crew chief in the summer while working at the Big Mountain Ski Resort in the winter. He eventually acquired his own balloon and is currently working on his commercial certificate. Casey flies primarily in the Flathead but makes it a point to attend the annual Big Sky Balloon Rally in Billings, among other events around the country.

The photograph and Casey's story demonstrate some of the many ways Montana airspace and airports are used and enjoyed.

Whatever type of aircraft you may be flying or however you may play a part in Montana Aviation, all of us at MDT Aeronautics Division wish you safe flying, clear skies, and favorable winds to take you to a comfortable landing zone.

## Aeronautics Division

### Administration

Tim Conway ..... Administrator  
Vacant.....Financial Contact

### Airports/Airways Bureau

Karen Hallenbeck..... Bureau Chief  
Stephen Torske..... Aviation Support Officer  
Derrick Olheiser ..... Aircraft Technician  
Jeff Kadlec ..... Yellowstone Airport Manager  
Bron Hansen..... Yellowstone Airport Operations Specialist  
Adam Moulton..... Yellowstone Airport Facilities Specialist

### Safety & Education Program

Matt Lindberg..... Bureau Chief  
Barbara Barnum.....Aviation Program Coordinator  
Page Green ..... Aviation Registration Program Manager  
Vacant ..... Aviation Program Manager

### Board of Aeronautics

Each of the nine Montana Aeronautics Board members are appointed by the Governor and confirmed by the Senate (MCA 2-15-2506). Board members remain in their position until a replacement is appointed and confirmed.

Visit [mdt.mt.gov/pubinvolve/aeronautics\\_board/boardmembers.shtml](https://mdt.mt.gov/pubinvolve/aeronautics_board/boardmembers.shtml) or scan the QR code with your mobile device to view current contact information for the Aeronautics Board.

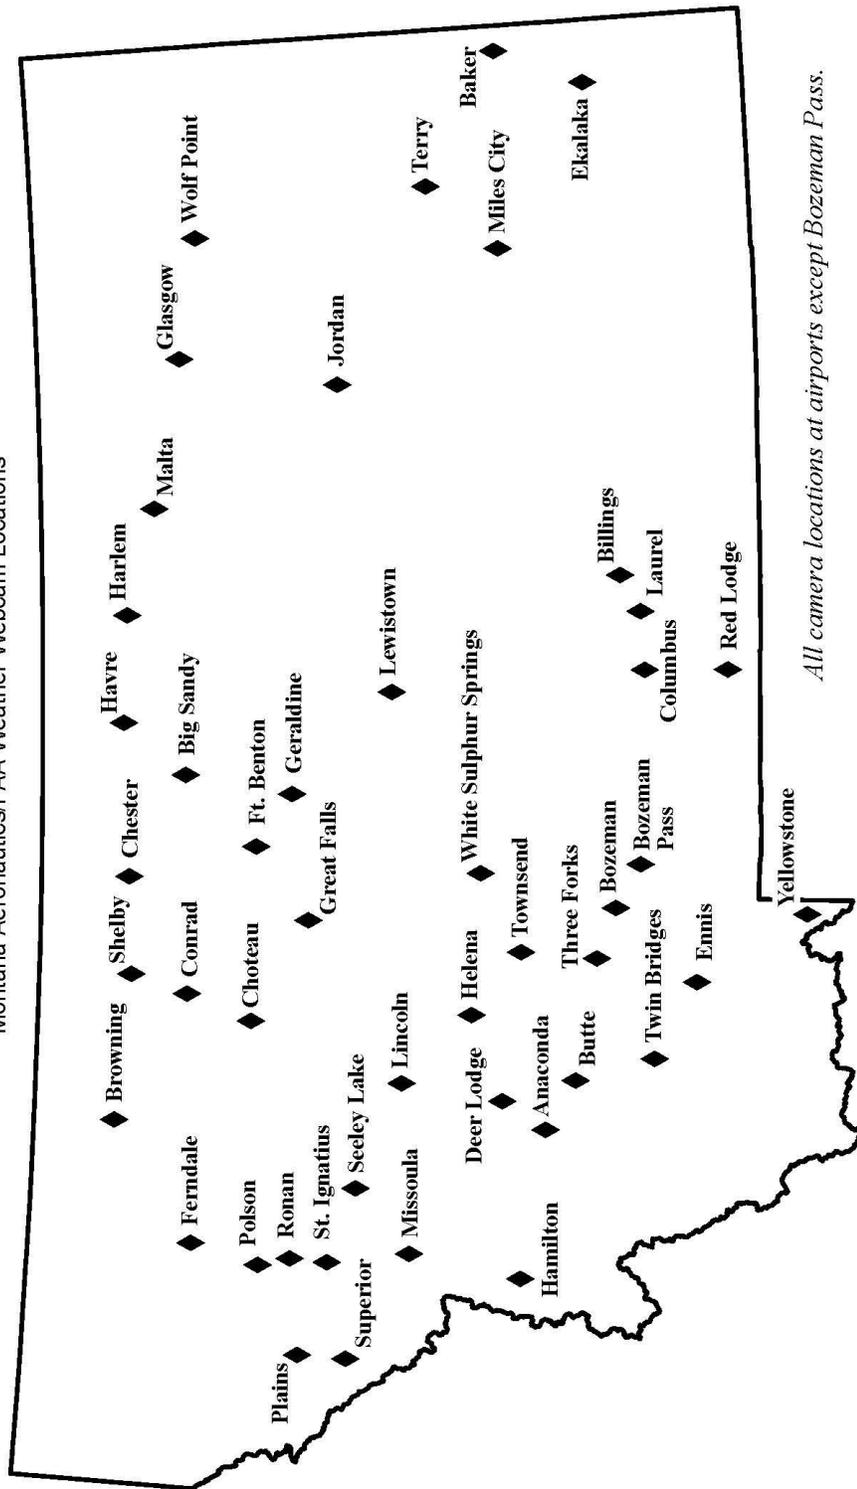

This airport directory has been compiled from information submitted by airport owners, flight operators, interested pilots, and inspections by the FAA and the Aeronautics Division. Every effort has been made to provide a complete and accurate directory. Because airport conditions are constantly changing, the Montana Aeronautics Division assumes no responsibility for any action taken by a pilot on the basis of information contained herein. Pilots are reminded it is their responsibility to check FAA Notices to Airmen for current information, the Chart Supplement, as well as making a visual inspection of the airport before using. Sixty-fourth edition revised to November 2024. **This airport directory is for reference only and should not solely be used or relied upon for aeronautical use.**

# Rules Pertaining to Aircraft Accidents, Incidents, Overdue Aircraft, and Safety Investigations

(National Transportation Safety Board Procedural Regulations, 49 CFR 830 (in part))

## 1. Immediate Notification

The operator of any civil aircraft, or any public aircraft not operated by the Armed Forces or an intelligence agency of the United States, or any foreign aircraft shall immediately, and by the most expeditious means available, notify the nearest National Transportation Safety Board (NTSB) office when:

- (a) An aircraft accident or any of the following listed serious incidents occur:
1. Flight control system malfunction or failure;
  2. Inability of any required flight crewmember to perform normal flight duties as a result of injury or illness;
  3. Failure of any internal turbine engine component that results in the escape of debris other than out the exhaust path;
  4. In-flight fire;
  5. Aircraft collision in flight;
  6. Damage to property, other than the aircraft, estimated to exceed \$25,000 for repair (including materials and labor) or fair market value in the event of total loss, whichever is less.
  7. For large multiengine aircraft (more than 12,500 pounds maximum certificated takeoff weight):
    - i. In-flight failure of electrical systems which requires the sustained use of an emergency bus powered by a back-up source such as a battery, auxiliary power unit, or air-driven generator to retain flight control or essential instruments;
    - ii. In-flight failure of hydraulic systems that results in sustained reliance on the sole remaining hydraulic or mechanical system for movement of flight control surfaces;
    - iii. Sustained loss of the power or thrust produced by two or more engines; and
    - iv. An evacuation of an aircraft in which an emergency egress system is utilized.
  8. Release of all or a portion of a propeller blade from an aircraft, excluding release caused solely by ground contact;
  9. A complete loss of information, excluding flickering, from more than 50 percent of an aircraft's cockpit displays known as:
    - i. Electronic Flight Instrument System (EFIS) displays;
    - ii. Engine Indication and Crew Alerting System (EICAS) displays;
    - iii. Electronic Centralized Aircraft Monitor (ECAM) displays; or
    - iv. Other displays of this type, which generally include a primary flight display (PFD), primary navigation display (PND), and other integrated displays;
  10. Airborne Collision Avoidance System (ACAS) resolution advisories issued when an aircraft is being operated on an instrument flight rules flight plan

## Rules (Continued)

11. and compliance with the advisory is necessary to avert a substantial risk of collision between two or more aircraft.
12. Damage to helicopter tail or main rotor blades, including ground damage, that requires major repair or replacement of the blade(s). Any event in which an operator, when operating an airplane as an air carrier at a public-use airport on land:
13. Lands or departs on a taxiway, incorrect runway, or other area not designed as a runway; or
  - i. Experiences a runway incursion that requires the operator or the crew of another aircraft or vehicle to take immediate corrective action to avoid a collision.
  - ii. An aircraft is overdue and believed to have been involved in an accident.

### 2. Manner of Notification

The most expeditious method of notification to the National Transportation Safety Board (NTSB) by the operator will be determined by the circumstances existing at the time. The NTSB has advised that any of the following would be considered examples of acceptable notification: Direct telephone notification.

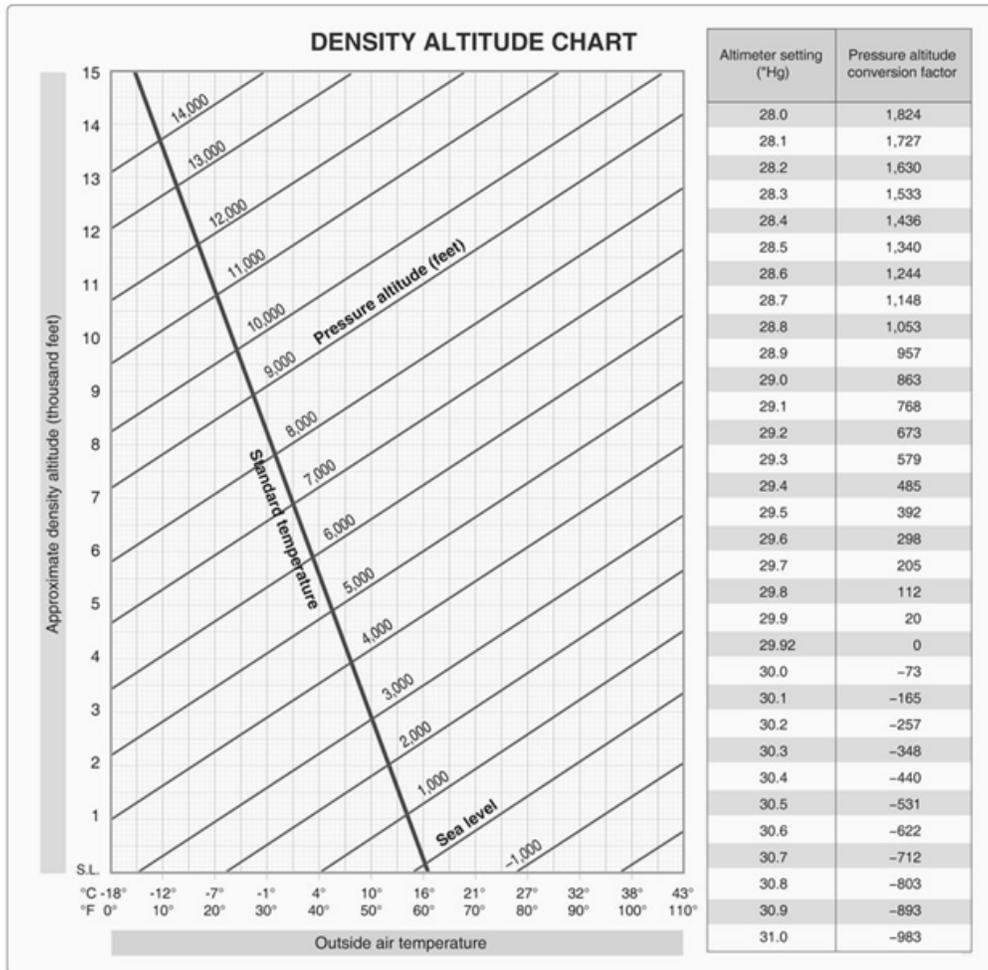

- (a) Notification to the FAA, who would in turn notify the NTSB by direct communication.

### 3. Reports

- (a) The operator of a civil, public (as specified in § 830.5), or foreign aircraft shall file a report on Board Form 6120. 1/2 (OMB No. 3147-0001)[2] within 10 days after an accident, or after 7 days if an overdue aircraft is still missing. A report on an incident for which immediate notification is required by § 830.5(a) shall be filed only as requested by an authorized representative of the Board.
- (b) Crewmember statement. Each crewmember, if physically able at the time the report is submitted, shall attach a statement setting forth the facts, conditions, and circumstances relating to the accident or incident as they appear to him. If the crewmember is incapacitated, he shall submit the statement as soon as he is physically able.
- (c) Where to file the reports. The operator of an aircraft shall file any report with the field office of the Board nearest the accident or incident.

### Applicable Phone Numbers

FSS .....	1-800-WX-BRIEF (1-800-992-7433)
Helena FAA Airports District Office .....	406-449-5271
Helena FAA Flight Standards District Office.....	406-449-5270
NTSB (Federal Way Washington Field Office) .....	253-874-2880
FAA Northwest Regional Accident Reporting.....	206-231-2099 (24 Hours)

## Fuel Types

### Fuel Types and Their Abbreviations

- 100LL ..... 100 octane low lead gasoline (blue)
- Jet A ..... Kerosene (freeze point -40°C.)
- Jet A1 ..... Kerosene (freeze point -47°C.)
- Jet A1+ ..... Kerosene with icing inhibitor (freeze point -47°C.)
- MOGAS ..... Automobile gasoline
- G100UL ..... 100 octane unleaded gasoline (orange)

## Time Conversion to GMT (Zulu)

Add the respective number of hours as shown below to the current time to obtain GMT (Zulu) time

EDT.....4	MDT(Summer) .... 6
EST.....5	MST(Winter)..... 7
CDT.....5	PDT..... 7
CST.....6	PST..... 8

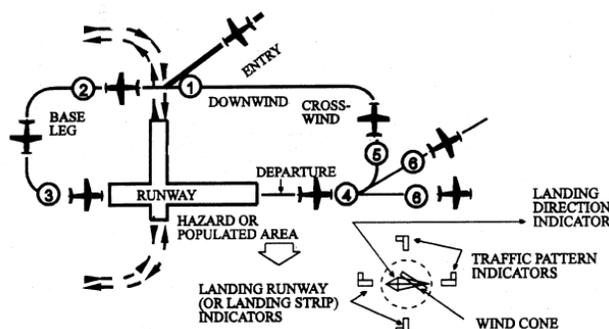

## Light Gun Signal Procedures For ATC

Color and type of Signal	On the Ground	In Flight
Steady Green	Cleared for take-off	Cleared for landing
Flashing Green	Cleared for taxi	Return for landing (to be followed by steady green at proper time)
Steady Red	Stop	Give way to other aircraft and continue circling
Flashing Red	Taxi clear of landing area (runway in use)	Airport unsafe – do not land
Flashing White	Return to starting point on airport	(No meaning)
Alternating Red and Green	Use extreme caution	Use extreme caution

## Morse Code and Phonetic Alphabet

Alpha	• —	Mike	— —	Yankee	— • — —

Lima	• — • •	X-Ray	— • • —	0	— — — — —

## Standard Left Traffic Pattern

### For Landings

- Enter pattern in level flight, abeam the midpoint of the runway, at pattern altitude.
- Maintain pattern altitude until abeam approach end of the landing runway, on downwind leg.
- Complete turn to final at least  $\frac{1}{4}$  mile from runway.

### For Take-Offs

- Continue straight ahead until beyond departure end of runway.
- If remaining in the traffic pattern, commence turn to crosswind leg beyond the departure end of the runway, within 300' below the traffic pattern.
- If departing the traffic pattern, continue straight out or exit with a  $45^\circ$  left or right turn (same as left/right hand traffic pattern) beyond the departure end of the runway after reaching pattern altitude.

## Format for Issuing a Pilot Report

- |                        |                |
|------------------------|----------------|
| 1. 3-Letter Station ID | 8. Visibility  |
| 2. Report Type         | 9. Temperature |
| 3. Location            | 10. Wind       |
| 4. Local time          | 11. Turbulence |
| 5. Altitude            | 12. Icing      |
| 6. Type Aircraft       | 13. Remarks    |
| 7. Sky Condition       |                |

## Custom Services Available at Listed Airports

### **Bozeman, Bozeman Yellowstone International Airport** AOE

US Customs User Fee Facility – 406-388-2144. Hours of operation: Thursday – Monday, 0900-1700. Appointments available 24/7 on case-by-case basis with officer availability and additional \$225 user fee. User fees based on aircraft gross weight.

### **Butte, Bert Mooney** LRA

Un-staffed location, serviced from Helena. Two hours advance notice and permission to land is required and strictly enforced. Available Monday – Friday 0800-1700, closed Saturday, Sunday, and holidays. Call 406-495-2195 to arrange for CBP services.

### **Cut Bank, Cut Bank** AOE LRA

Un-staffed location, serviced from Sweetgrass. Two hours advanced notice is required and strictly enforced. Available “on-call” 7 days a week. Call 406-335-9610 to arrange for CBP services.

### **Del Bonita, Whetstone International Airport** AOE LB

Unpaved landing strip, serviced from nearby Del Bonita Port of Entry. One hour advance notice and permission to land is required. Available “on call” 7 days a week; but may be unavailable due to local conditions. Call 406-336-2130 to arrange for CBP services and determine conditions. NOTE: runway straddles the international border, taxi to U.S. side and park for CBP clearance.

### **Great Falls, Great Falls International** AOE LRA

Full service CBP location. One hour advance notice is required. Available 7 days a week, normal business hours 0800-1600, after hours by firm appointment. Call 406-453-0861 to arrange for CBP services.

### **Helena, Helena Regional** LRA

Limited service CBP location. Two hours advance notice and permission to land is required. Available Monday – Friday 0900-1700, closed Saturday, Sunday, and holidays. Call 406-449-5506 to arrange for CBP services.

### **Kalispell, Glacier Park International** LRA

Full service CBP location. One hour advance notice and permission to land is required. Available Monday – Friday, 0900-1700, normally closed Saturday, Sunday, and holidays. After hours may be available by firm appointment. Call 406-257-7034 to arrange for CBP services.

### **East Poplar, Scobey Port of Entry** LRA LB

Unpaved landing strip, serviced from Scobey Port of Entry. One hour advance notice and permission to land is required. Available “on-call” 7 days a week; may be unavailable due to local conditions. Call 406-783-5375 to arrange for CBP services and determine conditions.

### **Sweetgrass, Ross International** LRA LB

Unpaved landing strip, serviced from nearby Sweetgrass Port of Entry. One hour advance notice and permission to land is required. Available “on call” 7 days a week; may be unavailable due to local conditions. Call 406-335-9610 to arrange for CBP services and determine conditions.

## IMPORTANT CHANGES

Customs and Border Protection (CBP) now requires pilots or their designees to transmit electronically via the Electronic Advance Passenger Information System (eAPIS) the following information for private aircraft flights arriving from or departing to a foreign place:

- Traveler manifest information for each individual traveling on board the aircraft;
- Notice of arrival information, and/or;
- Notice of departure information.

The data must be received by CBP no later than 60 minutes prior to departure of the aircraft.

Pilots must file a Flight Plan with FAA for international travel and may continue to place "ADCUS" (Advise Customs) in their remarks. However, ADCUS no longer meets CBP's advance notice requirements and may not substitute for filing eAPIS and making arrangements with the intended airport of arrival.

Pilots still must call CBP at the intended airport of arrival to be sure that a CBP Officer will be available at the requested arrival time, to make arrangements for after hours service, and to obtain permission to land (when applicable). Not all CBP airports of entry are staffed, and officers may respond from another location to meet arrivals; CBP must receive sufficient advance notice to enable officers to respond in time to meet the aircraft.

The CBP form 178 is obsolete and is no longer used, and faxed transmissions are no longer acceptable.

The eAPIS website is available at [eapis.cbp.dhs.gov](http://eapis.cbp.dhs.gov) and will provide private pilots with all the tools necessary to comply with the rule. Private pilots or their designees may enroll in eAPIS immediately and establish an account. Account number and passwords should be received within five business days of the enrollment request. For complete information on how to use eAPIS there is a help page available at [eapis.cbp.dhs.gov/docs/help.html](http://eapis.cbp.dhs.gov/docs/help.html).

AOE: Refers to a designated airport of entry.

LRA: Refers to a Landing Rights Airport, where you must obtain advance permission from CBP to land.

LB: Refers to a Land Border Airport, which is usually a small airstrip associated with a Port of Entry. The runways at these locations are usually unimproved turf or gravel and may harbor hazardous or unusual conditions. Normally they are not lighted and should be used during daylight hours only. Pilots should be familiar with local conditions before attempting to use these locations; often they are available strictly on a seasonal basis because of snow or mud.

CANPASS: Refers to Canadian automated arrival system and they can be reached by calling CANPASS (1-888-226-7277). The U.S. equivalent, called GATE was discontinued after 9/11.

**NEED HELP?** Call CBP at Great Falls International Airport, 406-453-0861. Also look for General Aviation and CBP Processing on the CBP website under the TRAVEL tab:

[www.cbp.gov/travel/international-visitors/general-aviation-and-cbp-processing](http://www.cbp.gov/travel/international-visitors/general-aviation-and-cbp-processing)

**REPORT AIR SMUGGLING! Call CBP's Air Marine Operations Center to report suspicious aircraft at 1-866-AIRBUST (1-866-247-2878).**

# Mountain Flying Tips

## General items

- Make sure that your proficiency level and your aircraft meet the special demands of your planned flight.
- If you are unsure of your capabilities, take some dual instruction from a flight instructor experienced in mountain flying.
- Keep your aircraft as light as possible.
- Be familiar with your planned route of flight and destination airport. Check the field conditions with FSS or experienced local pilots. Familiarize yourself in advance with the field length, elevation, and any special approach/departure procedures.
- Obtain a thorough weather briefing. A forecast of marginal VFR frequently translates to IFR in the mountains.
- Plan your trip for early morning or evening hours. Turbulence and density altitude are usually greatest from 10 a.m. -- 6 p.m.
- Stay out of the mountains if the forecast winds aloft exceed 30 knots at mountain top levels. The wind velocity can double in vicinity of mountain passes and canyons. Never fly up a blind or narrow canyon.
- Mountain winds follow contours much like a stream. The air on the lee (downwind) side of a mountain may be extremely turbulent. Fly on the upwind side of a canyon whenever possible.
- Cross-check your instruments and attitude indicator frequently. Visual horizons in the mountains may be illusory.
- Maintain your airspeed in downdrafts; don't panic. Be able to turn to lower terrain at all times.
- Approach ridges at a 45-degree angle. If caught in a downdraft, you must be able to turn away toward lower terrain.
- Be courteous to those on the ground who are enjoying a wilderness experience. Maintain sufficient altitude - 2,000 AGL is suggested over a wilderness area.
- Plan your trip over valleys as much as possible.
- Carry a good survival kit and familiarize yourself with its use.

## Landings

- Transmit in the blind on 122.9 MHz at non-Unicom airstrips and announce your intentions.
- A good check out and personal knowledge of conditions existing at "nonstandard" airports/airstrips is essential to a safe operation. Some mountainous airstrips are, or should be, considered "one-way". Although normally we are taught to land uphill, there are a number of airstrips where downhill/downstream landings are safer. A go-around must always be considered. Wet grass reduces braking action and most mountain airstrips are short.
- Control your rate of descent with power. Maintain a stable airspeed (generally the short field approach speed listed in your aircraft operations manual).
- Before beginning your approach, circle your intended destinations to ensure that the field is clear of other aircraft, livestock, wildlife, etc.
- Abort your approach if the air becomes too turbulent on your let down. Avoid low altitude maneuvering. Be alert for animals on the runway.

## Take-Off

- ***Check density altitude!*** (If take-off performance for your aircraft is questionable, wait until evening or early morning when the air is cool.)
- Remember that tall grass or soft field conditions can add considerably to your take-off distance.
- Choose a go/no-go point on the runway. If not airborne at that point, abort the take-off and wait for better conditions.
- Take-off downstream (downhill) whenever possible. Avoid taking off toward rising terrain.

## Survival

- Immediately after an emergency landing, exit the aircraft if possible. Check for injuries. Give only temporary first-aid and carefully remove those with serious injuries.
- Stay away from the aircraft, if possible, until engines have cooled and spilled gasoline has evaporated.
- After occupants are all out and a safe distance from the aircraft, reevaluate injuries and administer first aid as necessary. If the weather is adverse, make or find temporary shelter. Evaluate your location dangers: fire, sliding, rockslides, avalanche, terrain, weather.
- Stay near the aircraft if possible. It contains the basic ingredients for warmth, shelter, and signaling materials.
- Turn on or make sure that your ELT, Personal Emergency Locator, Spot Tracker or Spider tracks are activated. Call out on your Sat Phone or handheld radio if applicable.
- Signal for help. Do not neglect your aircraft radio. It's possible it may still be operational. Turn on squelch and volume and key the mike. If the results are positive, listen on local or ATC frequency. When you hear a transmission, transmit "MAYDAY-MAYDAY". If you should hear a jet, transmit on 121.5. All airlines and military aircraft monitor 121.5. If you do not hear any transmissions, go ahead and transmit in the blind on this frequency. Limit your transmissions to about one every 15 minutes. Transmitting places considerably more drain on the battery than receiving. If both your ELT and radio are working, you will hear the ELT signal when listening on 121.5. It may be necessary to turn the ELT off when transmitting or listening on 121.5. (Don't forget to turn the ELT back on!)
- If the weather is cold or wet don't spend too much time trying to signal. Your prime effort must be directed toward conserving the energy you have.
- The wings, rudder, etc., all may be used to make a shelter. Keep this shelter as small as possible to lessen the area your body must heat. Insulate shelters with boughs, bark, tarps, maps, etc. Use anything to keep rain from getting inside your shelter. Body heat loss is energy loss.
- Your aircraft can fulfill most of your basic needs if you improvise. Think basic needs: shelter (cover), warmth (fabric), tools (metal). Maps, newspaper, engine cover, plastic tarps all make excellent emergency bedding.
- Build a fire, if possible. Don't forget that the aircraft gasoline is a valuable resource in starting a fire when only wet wood is available. Caution must be used when using gasoline. Soak or pour gasoline on wood, but be sure container is out of reach when igniting the wood.
- Paper such as charts can also aid in getting a fire started. However, do not burn your charts for firewood. Paper makes an excellent insulation for bedding, clothing and

## Survival (continued)

- shelter. Note: Pre-plan building a fire. Have an adequate amount of wood gathered to keep the fire going for a length of time prior to lighting.
- In cold weather, insulation and upholstery from the aircraft makes excellent material for overshoes, sleeping bags, mittens, hats, and ground insulation. Sew them together with salvaged aircraft wire. Put plastic side out for better wetness protection.
- If running water is not readily available, melt snow or ice in improvised pot, or squeegee dewdrops from aircraft surfaces. Place a sheet of plastic flat on the ground so that it may collect dew or condensation. If it is raining, place a plastic sheet in a ground depression to collect water.
- Keep a signal fire burning all the times, if possible. Smoke and firelight can be seen from great distances. Both air and ground searchers will be looking for them.
- Aircraft should be made **visible from the air**, if possible. Clear brush, cut trees, etc. Be prepared to make signals as aircraft approach your area. Keep the mirror handy if the sun is shining. Practice its use.
- Get your emergency signaling devices ready and have signal equipment handy. Every possible effort must be made to attract searchers to your location by signals and to sustain life and energy until assistance arrives.
- Colored panels can tell a message. Pile brush in SOS. Stamp large, two-foot-wide letters SOS in the snow. Fill stamped marks with boughs or small brush.
- Clear windows make a fair emergency mirror. **Signals make you effectively bigger.**
- **Survival will depend greatly upon your state of mind. Psychological discipline is a must. You must sustain life until rescued. Remain calm! Think!**

### Example Survival Kit

Compass	Knife
Tool Kit (small, lightweight)	50' 1/8" nylon rope
First aid kit	Trash bags
Food (freeze dried, candy bars, etc.)	Fish hooks, sinkers, and line
Disposable space blankets	Can opener, Sierra cup
Lightweight folding saw	Waterproof fire starter
Waterproof matches and lighter	Sterno fuel and candle
Signaling devices or flares	Pad and pencil
Mirror, small flashlight	Parka and sleeping bag
Gun and ammo	Canteen with water

# Seaport Regulation Information

## Federal Regulations

### **U.S. Army Corps of Engineers**

#### **Seattle District-206-764-3742**

Libby Dam (Lake Kooncanusa) OPEN, 24-hours. Mooring, 500' from occupied public sites, 500' from dam.

#### **Omaha District-402-995-2082**

Fort Peck OPEN, obtain map of restricted areas from Corps. (Ask for latest edition, some new restrictions have been charted.)

### **U.S. Forest Service**

#### **Beaverhead National Forest-406-683-3900**

CLOSED to Seaplanes.

#### **Bitterroot National Forest-406-363-7100**

No seaplane restrictions.

Lake Como No seaplane restrictions.

Painted Rock Lake No seaplane restrictions.

#### **Custer National Forest-406-657-6200**

No bodies of water within the boundaries of this forest that could support seaplane operations. Cedar River and Grand River Grasslands cannot support seaplane operations.

#### **Deerlodge National Forest-406-496-3900**

Delmore Lake CLOSED to motor craft greater than 25 hp.

Homestake Lake CLOSED to all motorized craft.

Lowland Lake CLOSED to all gasoline motors.

All waters in the Anaconda Pintler Wilderness Areas closed to motorized use.

#### **Flathead National Forest-406-758-5208**

Lakes in Bob Marshall, Great Bear and Mission Mountains Wildernesses and the Jewel Basin Hiking Area CLOSED to motorized vehicles and equipment, as are segments of the Flathead River System that have been designated Wild and Scenic.

The following bodies of water are OPEN:

Hungry Horse Reservoir, Lindberg Lake, Holland Lake, Tally Lake, Bitterroot Lake

#### **Gallatin National Forest-406-587-6701**

No seaplane restrictions.

## **Seaport Regulation Information**

(Continued)

**Helena National Forest-406-499-5201**

No seaplane restrictions.

**Kootenai National Forest-406-293-6211**

Lakes and reservoirs within the Kootenai National Forest Boundary are generally open to seaplane landings except Cabinet Mountain Wilderness.

**Lewis and Clark National Forest-406-791-7700**

Crystal Lake    CLOSED to internal combustion engines.

Forest Lake    CLOSED to internal combustion engines.

**Lolo National Forest-406-329-3750**

Most bodies of water in the forest are too small to land seaplanes.

**State and Local Regulations**

**Aeronautics Division, Department of Transportation**

**Helena-406-444-2506; FAX-406-444-2519**

No state seaplane regulations.

Many water bodies in the state have restrictions on motorized vessels or require that no-wake operation speeds be maintained at all times. In these areas, seaplane operations would not be allowed. Contact the local Montana Fish, Wildlife and Parks office for information regarding specific operational restrictions on Montana lakes.

## Seaplane Landing Areas

(Many areas are private use facilities)  
(Prior notice is recommended)

**Chester** Lake Elwel 19 mi. SW of city. Telephone: 800-869-8422. Transportation: Courtesy Car. Food: Available. Fuel: Auto fuel by fuel truck from Tiber Marina, NE shore of lake. Notes: Additional phone: 406-759-5200. Showers & RV hookups available. Frontier Aviation, Joe Fenger, 406-759-5431.

**Dillon** Beaverhead Marina & Park SPB Location: Clark Canyon Reservoir, 20 mi. S of city. Telephone: 406-683-5556. Hours Attended: Daily. Mooring facilities: Docking. Food: Buffalo Lodge 406-683-5535.

**Ft. Benton** Lohse Air Spray Location: Missouri River. Telephone: 406-622-3323. Fuel: Need can to haul 100LL fuel from airport. Notes: Land on Missouri River E of bridges, dock at city park dock and ramp. Call airport for transportation and fuel. Not updated.

**Jordan** Hell's Creek Marina SPB. Location: Ft. Peck Lake, 25 mi. N of city. Telephone: 406-557-2345. Hours Attended: 7 a.m.-- 9 p.m. Mooring facilities: Docking; Ramp. Food: Available on site. Lodging: Available on site. Camping: Available on site. Notes: Emergency use only.

**Libby** Koocanusa Lake Resort & Marina Telephone: 406-293-7548. Food: Café. Lodging: Cabins. Camping: Available. Fuel: Auto at dock; 100LL available from Libby Airport. Credit cards accepted: Yes. Notes: Sheltered cove on very long lake. Not updated.

**Miles City** Yellowstone River Fuel: Call 123.0 or 406-232-1021 (Falcon Aviation) for delivery. Notes: Rocky, approach with care, very shallow. Be prepared to carry gas in cans. Not recommended if you want to preserve floats. Not updated.

**Polson (8S1)** Lake Aero SPB Location: Flathead River, .5 mi. SW of city. Coordinates: N47°-42.7'; W114°-11.1'. Waypoint: 8S1 112.8. Telephone: 406-883-2482 & 406-883-5299. Hours attended: 8 a.m.—6 p.m. Elevation: 2941'. Pattern altitude: 4000'. Landing lanes: 3-21 4,000'x500' Obstructions: Rocks on E. shoreline. Mooring facilities: Dock, Windsock, Beaching; Pullout. Docking facility is seasonal. Facility may not be usable at certain times in summer, check NOTAMS. Frequencies: Unicom 122.8. Sectional: Great Falls. Transportation: Rental cars and taxi. Food: KwaTaqNuk; Lake City Bakery; McDonald's; El Rancho; China Gate. Lodging: Super 8, 883-6251; KwaTaqNuk, 800-882-6263; Port Polson, 883-5385 within 1-2 mi. Camping: available on field. Local attractions: Flathead Lake; Glacier National Park; National Bison Range; Big Mountain Ski Resort within 75 mi. Services: Repairs; Flight instruction; Automobile & aircraft rental. Fuel: (delivered on call) Jet A; 100LL. Credit cards accepted: Yes.

## Seaplane Landing Areas

(Continued)

**Seeley Lake (M35)** Lindey's Landing West SPB Location: Seeley Lake, 1 mi. NW of city. Coordinates: N47°-10.5'; W113°-28.8'. Telephone: 406-677-4101. Hours attended: Daylight, June-Sept.; Unattended, Oct.-May. Elevation: 3,993'. Landing Lanes: 12-30; 14,000' x1,000'. Mooring facilities: Docking. Frequencies: Unicom 122.9. Sectional: Great Falls.

**Somers** Flathead Lake Telephone: 406-257-7678. Transportation: Rental car. Fuel: 100LL. Owner will bring fuel to marina. Notes: Not updated.

**Whitefish** Stillwater Landing SPB Location: Lower Stillwater Lake, 12 mi. NW of city. Coordinates: N48°-52.2'; W114°-34.5'. Waypoint: FCA 113.2 303/25 mi. Telephone: 406-881-2236. Hours Attended: Seasonal. Elevation: 2,780'. Pattern Altitude: 3,800'. Mooring facilities: Beaching; Docking. Sectional: Great Falls. Food: Grouse Mountain Lodge 10 mi. 406-862-3000; Comfort Inn 12 mi. Camping: on-site: Local Attractions: Whitefish Mountain Ski Area 12 mi.; Glacier National Park 35 mi.

**Wolf Point** Missouri River Fuel: Available via truck from French Aviation, 406-653-1740. Notes: Located 3 mi. S of airport. Dock is 1/4 mi. W of bridge. Two power lines W of the bridge, swift current, water level fluctuates. Not updated.

**West Yellowstone (8M3)** Yellowstone SPB Location: Hebgen Lake 13 mi. NW of city. Coordinates: N44°49.80' W111°17.25'. Telephone 406-208-3004. Elevation: 6,534'. Landing Lanes:13-31; 12,007'x3,000'. Unicom 123.0 Sectional: Great Falls. No docking or mooring location.

### Seaplane Pilots

The Aeronautics Division receives inquiries regarding seaplane operation and availability information. For further information from the Montana Seaplane Pilots Association, contact Perry Brown at 406-249-3637

## VOR Receiver Check Points

## Aeronautical Chart Symbols

The Montana Aeronautics Division uses the following standardized symbols within this directory and the Montana Aeronautical Chart. The National Association of State Aviation Officials (NASAO) has agreed on the following symbols for standardization. Please be aware that these symbols may not be standard for all government agencies or maps and charts you may purchase.

★		Airport Beacon
○		Unpaved runways - Public Airport
<div style="display: flex; align-items: center;"> <div style="margin-right: 10px;"> <b>Airport Name</b>            3684            L 41 122.8         </div> <div style="border-left: 1px solid black; padding-left: 5px; margin-left: 10px;">           3684            L 41 122.8         </div> </div>		Unicom Frequency (if present)
		Length of Longest Runway in Hundreds of Feet
		Lighted Runway
		Elevation in Feet
⊕		Operator or Service Available (Aviation gas minimum)
⊙		Military Field
▬		Paved (with runway pattern)
Ⓟ		<b>PROHIBITED (USFS or Wilderness)</b> Conditions unknown, unlawful to use, abandoned.
Ⓡ		<b>Restricted</b> <b>PRIVATELY OWNED (Not for public use) ...</b> Possible unreported hazards. User assumes all risk.
Ⓢ		<b>Warning</b> <b>AIRPORT ... (Not built to normal dimensional standards. Requires special techniques and procedures in use. NOT INTENDED FOR FULL PUBLIC ACCESS. Owner requests users seek pre-arrangement with full and responsible understanding of the safety factors involved).</b>
⊗		Abandoned
⊗Ⓟ		Abandoned and Prohibited
△ H		Heliport
△ +		Heliport (Hospital Emergency Only)

## Alpha-Numeric Airport GPS Identifier List

### Please help prevent false ELT alerts!

Check your radio on frequency 121.5 MHz before shutting down your engine after every flight. Should your ELT be accidentally activated, you will hear it sounding. If you find yourself in this situation, switch it off and call the Air Force Rescue Coordination Center (AFRCC) to let them know it was accidentally going off, you silenced it, and everything is okay. Chances are, search efforts are already underway to look for you, even if your ELT was on for only a few seconds! Do not ignore it.

You can contact AFRCC 24/7 at 1-800-851-3051.
