LAND OF THE SHINING MOUNTAINS

MONTANA HIGHWAY MAP 1939

MONTANA

The Treasure State

Out Where The West Lives On

To All Of Those Who Love The Outdoors, Greetings:

This year the Golden Gate International Exposition and the New York World's Fair are the lode stones attracting millions of travelers. Each of these fairs is replete with the finest examples of man's genius. Each of them is packed with amazing inventions; with scientific marvels; with every kind of entertainment and amusement device. Of course you will want to see them.

When motoring to these fairs, why not take the cool Northern route and see Montana, the Treasure State? We have spectacular displays too and they are so numerous we challenge you to count them. They were planned, designed and made by Mother Nature. They are too deeply rooted and too far flung to move bodily to the fairs. Their magnificence dwarfs man's most ingenious efforts. Were we not hampered by modesty to the point of being practically inarticulate concerning these wonders of Nature we would throw a long verbal lariat and dilate on our unsurpassed scenic beauty, our vast recreational areas, our salubrious climate. We would mention the real Western hospitality where the latch string is always out. But let it pass—we simply invite you to come and see us and take home with you a mental picture you never can forget, a picture of the Land of the Shining Mountains—out where the West lives on.
