

CONSTRUCTION AHEAD

The Montana Department of Transportation (MDT) and Montana Materials & Construction will apply a seal and cover (scrub seal) to approximately 11 miles of Interstate 15 (I-15) near Helena. Additionally, this project will see a crack seal applied to six bridges along I-15 in the project area. Several interchange ramps will also receive a scrub seal as part of this project.

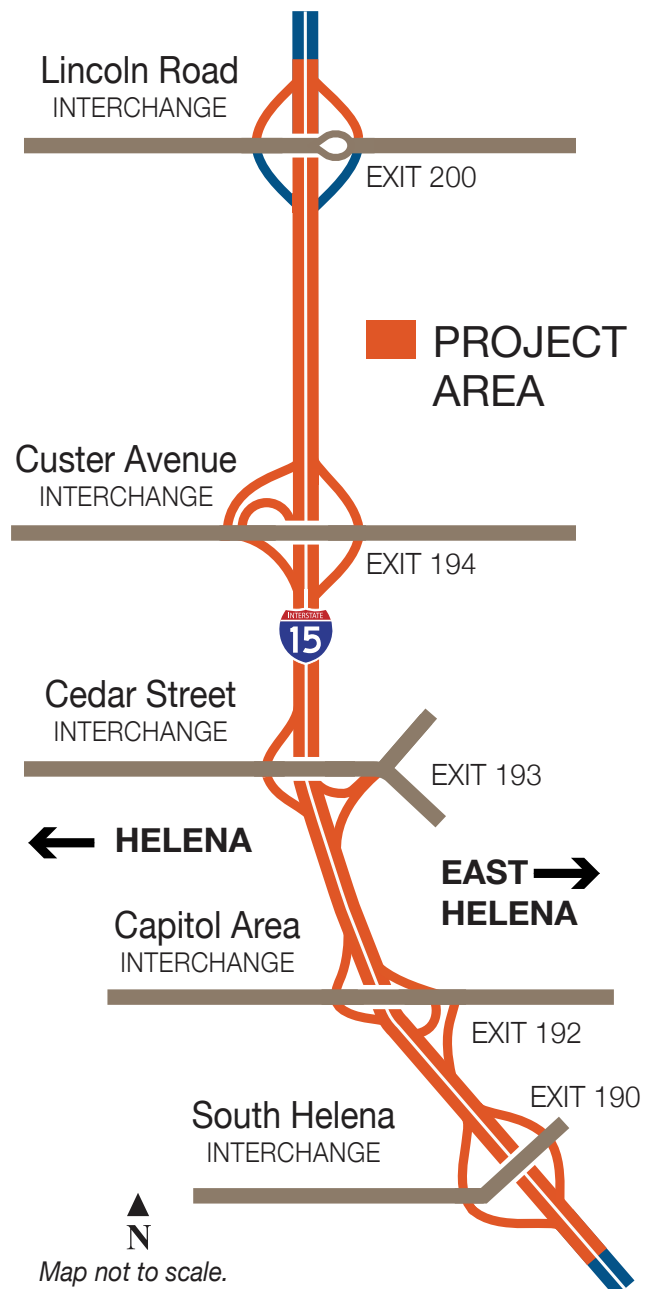

PLANNED IMPROVEMENTS INCLUDE:

- ✔ Applying a seal and cover (scrub seal) on approximately 11 miles of I-15
- ✔ Applying a scrub seal on all on- and off-ramps of Exit 190, Exit 192, Exit 193, and Exit 194
- ✔ Applying a scrub seal on the southbound off-ramp and northbound on-ramp of the Lincoln Road Interchange (Exit 200)
- ✔ Applying a crack seal on six interstate bridges on north- and southbound I-15 located at Boulder Avenue, Tenmile Creek, and Sierra Road
- ✔ Adding new pavement markings

WHY IS THE PROJECT NEEDED?

MDT identified this stretch of interstate as being worn down and in need of repairs. The pavement is showing signs of deterioration, and the scrub seal will rejuvenate the existing asphalt and provide a new layer of protection. This project will reduce the regular maintenance needed on this section of roadway and allow it to continue servicing the traveling public.

SEE REVERSE FOR MORE INFORMATION.

WHAT TO EXPECT DURING CONSTRUCTION

Construction is anticipated to begin in summer 2025 and be completed in the fall.

When construction begins, motorists can expect:

- Traffic reduced to one lane
- Reduced speed limits
- Temporary closures of interchange ramps when scrub seal is applied
- Wide loads restricted at times

Visit 511mt.net for the most up-to-date information on current traffic conditions and restrictions.
