Project Overview

The Montana Department of Transportation (MDT), in partnership with engineering consultant Sanbell, is designing a roundabout at King Avenue West and South 64th Street West.

Traffic has increased significantly in southwest Billings as new businesses and homes have been developed. Crashes have also increased at the intersection.

The project aims to:

ENHANCE SAFETY AT THE INTERSECTION

IMPROVE TRAFFIC FLOW

REDUCE VEHICLE CONFLICT POINTS

BETTER ACCOMMODATE CURRENT AND FUTURE TRAFFIC NEEDS

KING AVENUE & 64TH STREET
BILLINGS

KING AVENUE & 64TH STREET - BILLINGS
ANTICIPATED PROJECT TIMELINE

FALL 2026
~30-50% design completed

SUMMER 2027
~80% design completed

WINTER 2027
Final plans completed

2028
Right-of-way and utility negotiations

2029
Estimated construction start

The project timeline is dependent on the completion of design, the availability of funding, and unforeseen factors.

Project Funding

The final project budget is still to be determined. Determining the cost of the project is part of the design phase.

An initial estimated total budget ranges from $4.5-5.5 million.

The project is funded through:

- **City of Billings Local Funds**

- **Highway Safety Improvement Program (HSIP)**
  Provides federal funding for projects that reduce serious injuries and fatalities at locations with higher-severity crashes.

- **Surface Transportation Program – Secondary (STPS)**
  Provides federal funding, with a state match, for projects improving Montana's secondary highways and intersections.

Why A Roundabout?

Roundabouts reduce traffic delays, speeds, and crashes.

The roundabout's circular design and one-directional traffic flow virtually eliminate the deadliest T-bone and head-on crashes. They also reduce rear-end crashes because traffic must slow down to enter the roundabout.

↓ 90% FATAL CRASHES

↓ 75% INJURY CRASHES

↓ 37% OVERALL CRASHES

VISION ZERO

MDT is committed to Vision Zero – the goal of zero deaths and zero serious injuries on Montana's roadways.

Our approach to improving safety on our roadways focuses on key elements of traffic safety – also known as the four "Es":

1. **EDUCATION**
   through public information and traffic safety outreach campaigns.

2. **ENFORCEMENT**
   of Montana's traffic laws through the presence of law enforcement.

3. **ENGINEERING**
   of Montana's roadways to ensure best practices are implemented and maintained with safety as the priority.

4. **EMERGENCY MEDICAL RESPONSE**
   to support emergency services so they are adequately funded and equipped to respond to crashes.
