PROJECT MAP

PROJECT DETAILS

The Montana Department of Transportation (MDT) is planning for the North of Stevensville-North construction. This project, located about four miles north of Stevensville, will add safety improvements to Secondary 203, or the Eastside Highway.

HIGHWAY IMPROVEMENTS INCLUDE:

12-foot-wide travel lanes

A 12-foot-wide center two-way left-turn lane

4-foot-wide shoulders

Safer roadside slopes and ditches

Improved vertical alignment and drainage

Upsized and new culverts to provide locations for wildlife to safely cross under the roadway

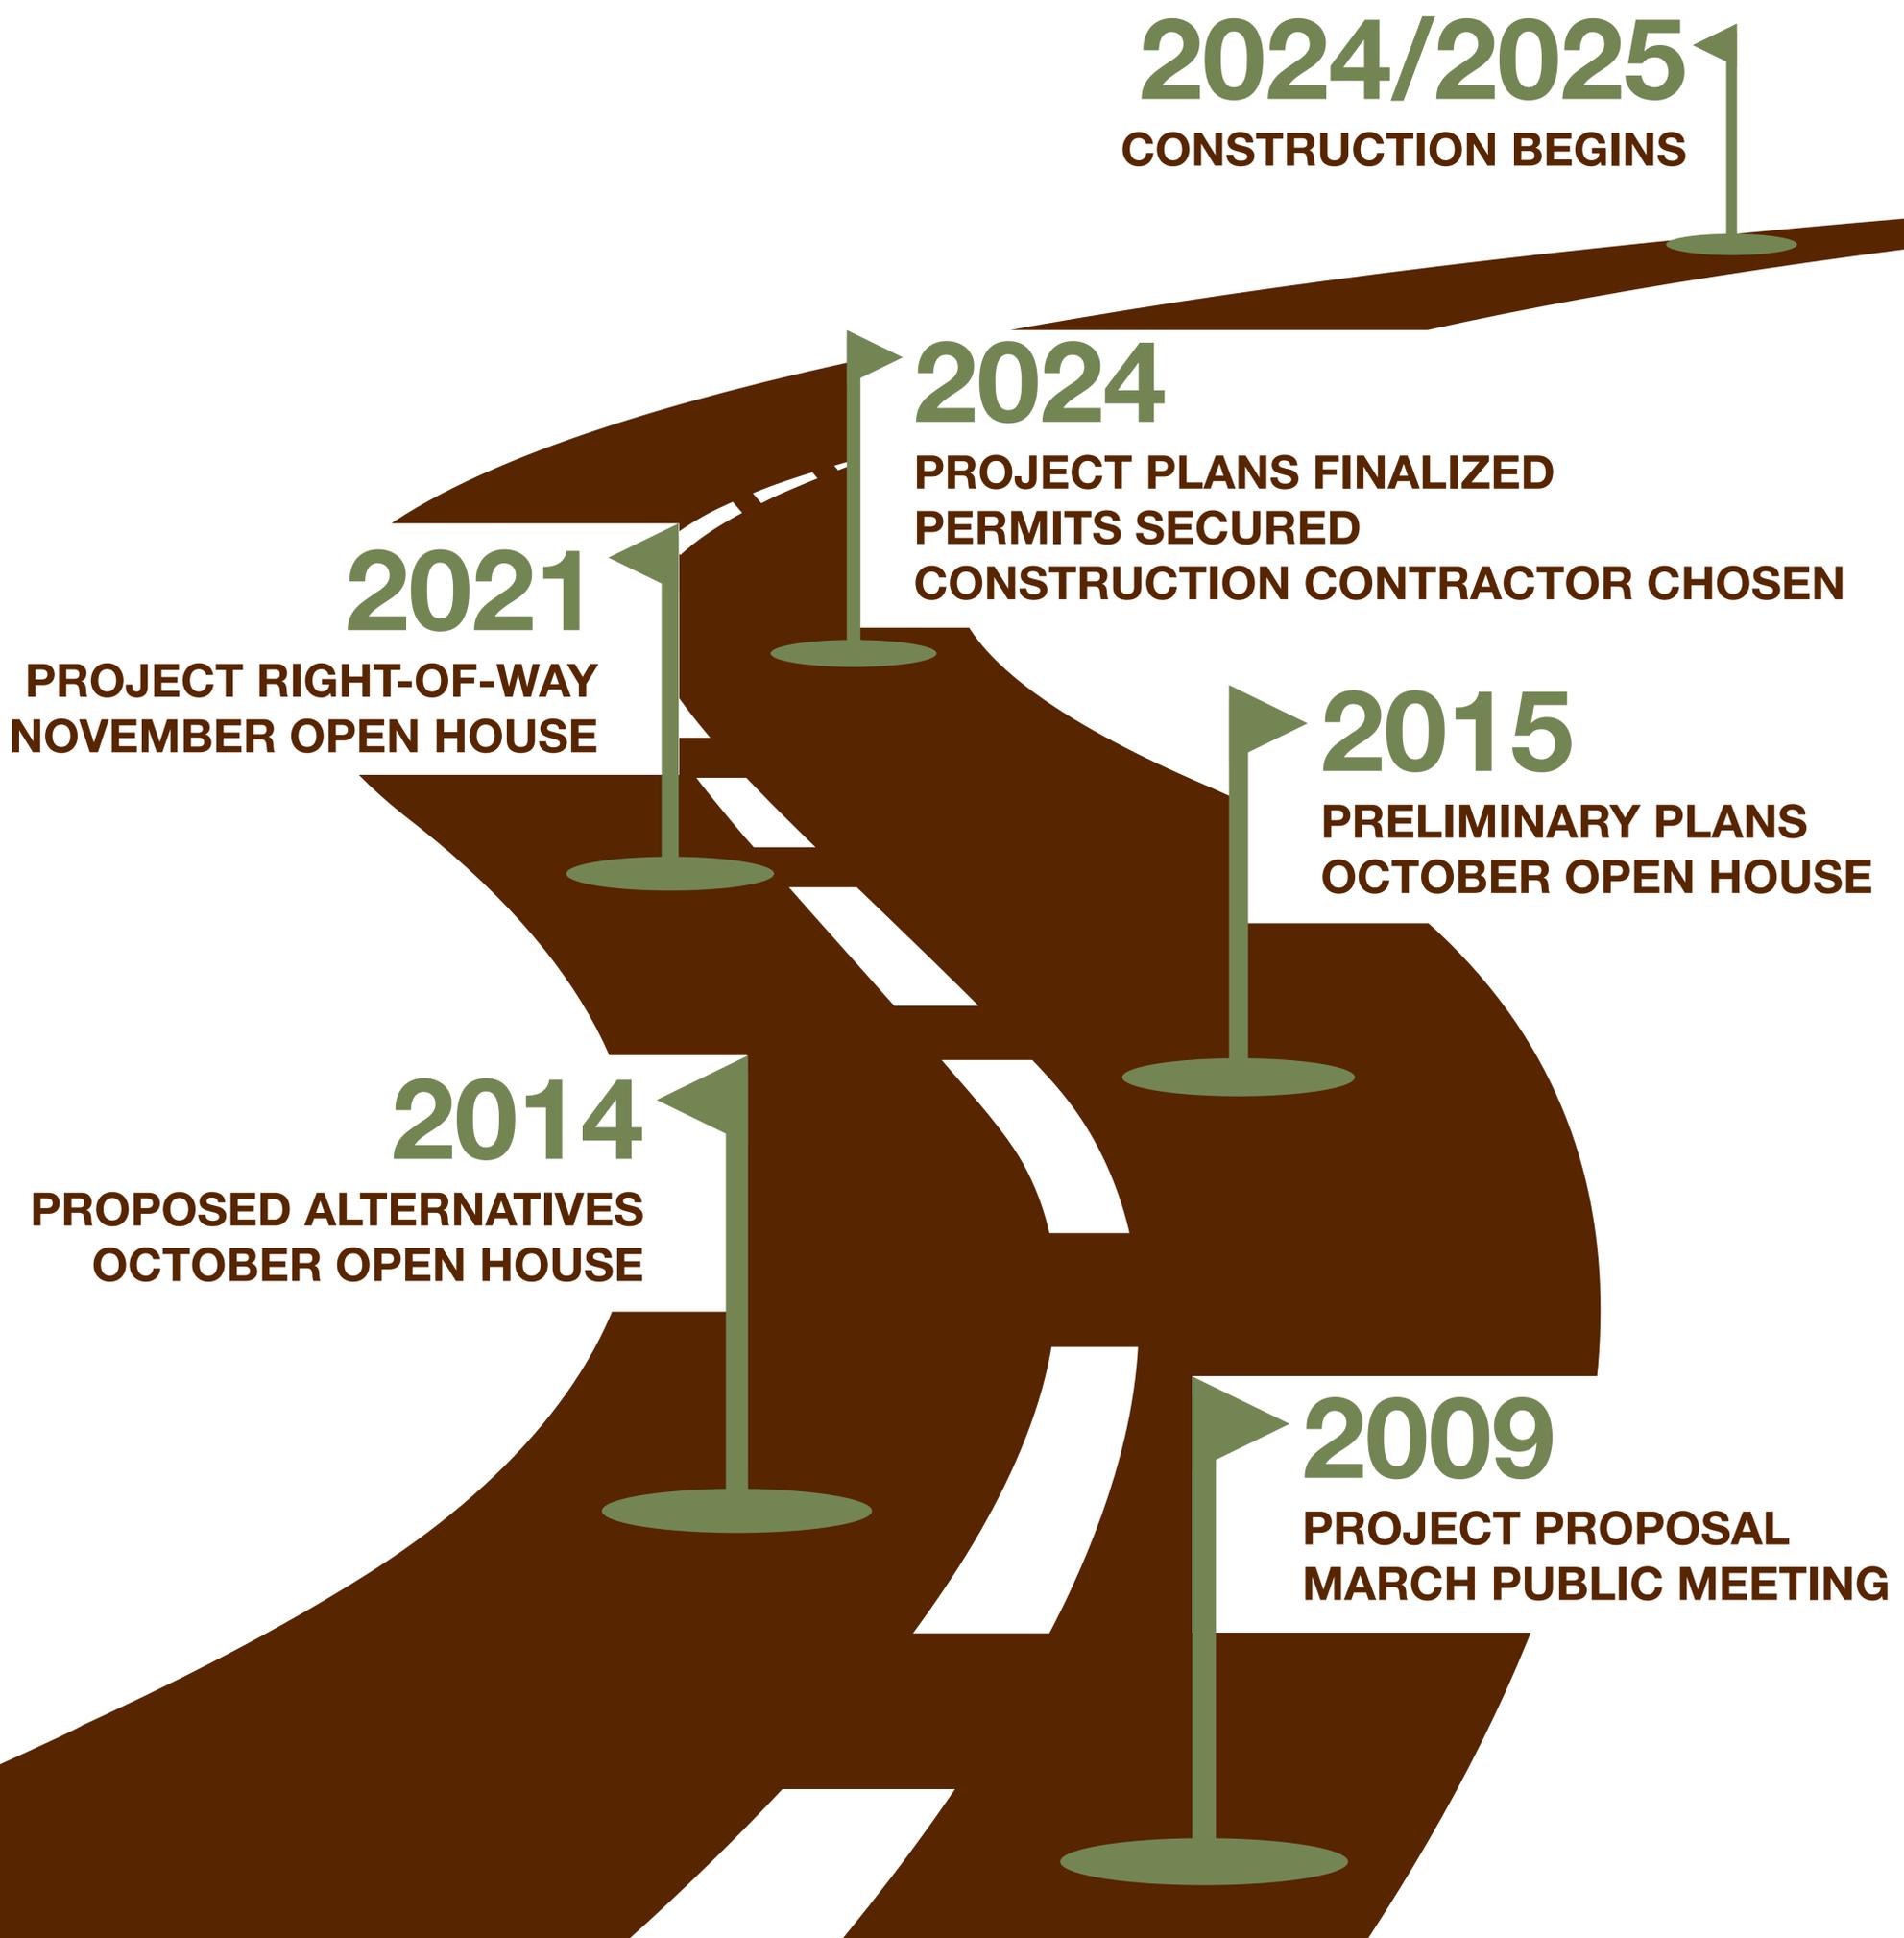

Reconstruction of 90 degree corners with:
A large radius curve across Rathbun Lane
A 4-legged roundabout across Ambrose Creek Road

PROJECT BUDGET: \$15.6 Million

PROJECT TIMELINE

MDT has diligently worked on the project design, listened to public feedback, made alterations, and has now reached the right-of-way acquisition phase.

Public involvement is vital in every phase of this project. Providing insight, voicing concerns, and asking questions is an essential component to designing and ultimately building a successful community project.
