

WALK SAFE!

THE FACTS

From 2009-2013:

980 Pedestrians were involved in crashes

73 Pedestrians were killed

8%

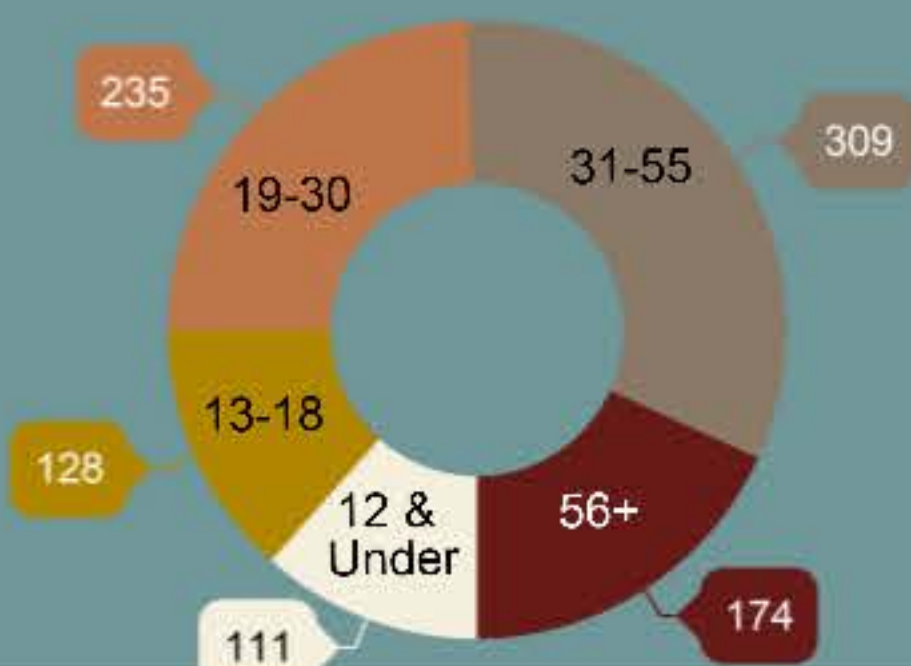

of pedestrian crashes resulted in **DEATH**

1 in 6 pedestrians involved in crashes were **IMPAIRED**

IT'S NOT JUST KIDS!

Age of Pedestrians Involved in Crashes

Crashes most frequently happen at intersections, in the daytime.

BUT

55% of fatal crashes occur on rural roadways, outside city limits

60% of pedestrians in crashes were **male**

SAFETY TIPS

PAY ATTENTION

Don't use cell phones, headphones or other electronics when walking.

See AND Be seen

- Stay out of driver's blind spot.
- Wear bright, reflective clothing.
- Use a flashlight at night.

CROSS AT INTERSECTIONS USING TRAFFIC SIGNALS

Always look left - right - left before crossing into the street - even if the walk signal is activated!

WALK FACING TRAFFIC

If there is no sidewalk, walk facing oncoming traffic (left of road), as far from traffic as possible.

#VisionZeroMT
zero deaths | zero serious injuries
