Annual Meeting Purpose

Purpose Driven Strategy Development

Identify Emphasis Area Implementation Plan aspects with specific objectives, strategies, actions, action leads, and measurables to evaluate progress.

Purpose Driven Strategy Development

- The Federal Highway Administration (FHWA) emphasizes the importance of using data for effective safety management and decision-making for:

- Problem Identification
- Prioritizing Safety Projects
- Developing Countermeasures
- Evaluating Effectiveness
- Informing Policy and Legislation
- Guiding Investment Decisions

Purpose Driven Strategy Development

- The SHSP is a data-driven process. All elements of the SHSP process, from development to evaluation, require States to analyze and make effective use of State, regional, local and tribal safety data¹.
- Data enable managers to:
 - identify safety problems
 - select proper strategies and countermeasures
 - monitor progress toward achieving SHSP goals and objectives,
 - measure the effectiveness of SHSP strategies
 - identify needed improvements
 - direct limited resources to the highest potential for reducing fatalities and serious injuries.

Fatalities & Serious Injuries (FSI)

Fatalities & Serious Injuries (FSI) By Emphasis Area

Total of 9981 FSI

**Please note that the figure percentages and numbers above may not sum up to the yearly total for the FSI. This discrepancy results from overlaps among existing sub-emphasis areas within each primary emphasis area.*
